

*Blueprints*  
*Stud Dog Showcase*

*2011*

*Letter from the Editor,*

In late spring, I received a telephone call from a longtime club member who had a proposal for me and for the USKBTC to print a stud dog issue that club members could save and refer to, or dedicate a section of an upcoming issue. So I took the suggestion to the Officers and Board of the USKBTC, and received their approval and support. Now we had to make it happen. What followed was six months of behind the scenes work: regular posts to the USKBTC website, weekly posts to the USKBTC facebook page and emails to the owners of stud dogs around the country. We settled on a simple format, and waited for folks to submit their ads. That may have been the hardest part, waiting for the ads to arrive so the real work could begin. And finally, here it is at last.

You hold in your hands the USKBTC 2011 Stud Book Showcase. I want to thank the officers and board for being receptive to this idea, and giving us the go ahead to move forward with this ambitious project. I want to thank all those members who shared their special Kerry boys with us by taking an ad. Most of all I want to thank Reita Nicholson, who worked tirelessly to translate all the photographs, pedigrees and ad information into concise, eye-catching ads. Her efforts enabled me to put the finishing touches on the Fall/Winter 2012 issue, so that it would be ready to go when the Stud Dog Showcase was ready. I couldn't have done it without her!

I hope all of you enjoy this issue, and refer to it often. There are some fine young dogs in these pages, and the future looks promising. And with any luck, you will have a fine young male to include in our next issue in years to come.

*Janie MacBryde*  
*Blueprints Editor*

*Disclaimer:*

*The United States Kerry Blue Terrier Club, Inc. is providing this Stud Dog Issue as a service to the membership. This issue contains a combination of dogs owned by members of the USKBTC as well as breeders out of the United States who have chosen to participate. The USKBTC makes no representations about the accuracy of the claims in any advertisement nor does the USKBTC endorse any dog or breeder shown in this issue. The USKBTC recommends all breeders contemplating using one of these dogs to do their own due diligence regarding pedigree, any health testing they feel important, as well as researching the breeder who owns the dog.*

## Kerry Blue Terrier Standard

**General Appearance** - The typical Kerry Blue Terrier should be upstanding well knit and in good balance, showing a well-developed and muscular body with definite terrier style and character throughout. Correct coat and color are important. A low-slung Kerry is not typical.

**Size, Proportion, Substance** - The ideal Kerry should be 18 1/2 inches at the withers for a dog, slightly less for a bitch. In judging Kerries, a height of 18-19 1/2 inches for a dog, and 17 1/2-19 inches for a bitch, should be given primary preference. Only where the comparative superiority of a specimen outside of the ranges noted clearly justifies it should greater latitude be taken. In no case should it extend to a dog over 20 inches or under 17 1/2 inches, or to a bitch over 19 1/2 inches or under 17 inches. The minimum limits do not apply to puppies. The most desirable weight for a fully developed dog is from 33-40 pounds, bitches weighing proportionately less. A well-developed and muscular body. Legs moderately long with plenty of bone and muscle.

**Head** - Long, but not exaggerated, and in good proportion to the rest of the body. Well balanced. Eyes-Dark, small, not prominent, well placed and with a keen terrier expression. Anything approaching a yellow eye is very undesirable. Ears-V-shaped, small but not out of proportion to the size of the dog, of moderate thickness, carried forward close to the cheeks with the top of the folded ear slightly above the level of the skull. A "dead" ear, houndlike in appearance, is very undesirable. Skull-Flat, with very slight stop, of but moderate breadth between the ears, and narrowing very slightly to the eyes. Foreface full and well made up, not falling away appreciably below the eyes but moderately chiseled out to relieve the foreface from wedginess. Little apparent difference between the length of the skull and foreface. Jaws deep, strong and muscular. Cheeks-Clean and level, free from bumpiness. Nose-Black, nostrils large and wide. Teeth-Strong, white and either level or with the upper (incisors) teeth slightly overlapping the lower teeth. An undershot mouth should be strictly penalized.

**Neck, Topline, Body** - Neck-Clean and moderately long, gradually widening to the shoulders upon which it should be well set and carried proudly. Back short, strong and straight (i.e., level), with no appearance of slackness. Chest deep and of moderate breadth. Ribs fairly well sprung, deep rather than round. A slight tuck-up. Loin short and powerful. Tail should be set on high, of moderate length and carried gaily erect, the straighter the tail the better.

**Forequarters** -Shoulders fine, long and sloping, well laid back and well knit. The elbows hanging perpendicularly to the body and working clear of the side in movement. The forelegs should be straight from both front and side view. The pasterns short, straight and hardly noticeable. Feet should be strong, compact, fairly round and moderately small, with good depth of pad free from cracks, the toes arched, turned neither in nor out, with black toenails.

**Hindquarters** - Strong and muscular with full freedom of action, free from droop or crouch, the thighs long and powerful, stifles well bent and turned neither in nor out, hocks near the ground and, when viewed from behind, upright and parallel with each other, the dog standing well up on them.

**Coat** - Correct coat is important. It is to be soft, dense and wavy. A harsh, wire or bristle coat should be severely penalized. In show trim the body should be well covered but tidy, with the head (except for the whiskers) and the ears and cheeks clear.

**Color** - Color is important. The correct mature color is any shade of blue gray or gray blue from the deep slate to light blue gray, of a fairly uniform color throughout except that distinctly darker to black parts may appear on the muzzle, head, ears, tail and feet. Kerry color, in its process of "clearing" changes from an apparent black at birth to the mature gray blue or blue gray. The color passes through one or more transitions--involving a very dark blue (darker than deep slate), shades or tinges of brown, and mixtures of these, together with a progressive infiltration of the correct mature color. The time needed for this "clearing" process varies with each dog. Small white markings are permissible. Black on the muzzle, head, ears, tail and feet is permissible at any age. A black dog 18 months of age or older is never permissible in the show ring and is to be disqualified.

**DISQUALIFICATION:** A black dog 18 months of age or older is to be disqualified. (white markings on a black dog 18 months of age or older does not constitute clearing or mature color and the dog is to be disqualified.)

**Gait** - Full freedom of action. The elbows hanging perpendicularly to the body and working clear of the sides in movement; both forelegs and hind legs should move straight forward when traveling, the stifles turning neither in nor out.

**Disqualifications** - A black dog 18 months of age or older is to be disqualified. (white markings on a black dog 18 months of age or older does not constitute clearing or mature color and the dog is to be disqualified.)
